x   equal to core
●   comparable to core but not equal (country-specific)
●/x   not yet created due to methodological problems

*1 one generic question for all kind of persons: see add07_14

*2 nlmch not surveyed

*3 one generic question for all kind of persons: see add10_09 (only sample C)

*4 only nlmcb is country specific since the question specify "your OWN children"

*5 surveyed using an additional questionnaire (supplement to the interview) the respondents had to post: about 40% of missing values on each variable

*6 only one variable concerning other members of the family (female and male) was computed (nlmcc11) and nlmch not surveyed

*7 one generic question for all kind of persons: see add02_23

*8 nlmcj27 is included in the dataset = additional variable concerning "priest, pastor, sheik"

*9 surprising distributiuon: "informal and supportive contacts" might have been understood in a different way than in other countries and/or might be due to a country specific "living" situation (e-mail: Akan - 17/dec/04)

*10 variable unavailable at this time

*11 one generic question for all kind of persons: see add23_39

*12 one generic question for all kind of persons: see q10_1
